Art Unit: 2161

This is in response to application filed on October 18, 2004 in which claims 1-17 are presented for examination.

Status of Claims

Claims 1-17 are pending.

Allowable Subject Matter

Claims 1-17 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: The present invention is directed to control structures for tree searches in embedded processing systems.

The Closest prior art [Hyland et al. US 2003/0009474 A1 in view of Loizides et al. U.S. Patent no. 3,634,226] discloses a system and method for organizing multiple search levels of data into sub-trees contained in fixed size blocks of shared external memory of an embedded processing system. However, neither Hyland et al. nor Loizides disclose the claimed feature of **requiring each reference to the data to proceed from one-half of a sub-tree during a descent of the search tree based on a search pattern**. This claim feature being present in independent claims 1, 6, 11, and 16-17 render claims 1-17 allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
